BOTOX

What is BOTOX ?

Botulinum toxin is commonly known as Botox . Botox is a Neuromodulator which prevents muscles from contracting & is commonly used in treatment of facial wrinkles (anti-ageing).

Areas of skin improvisation:

Treatment can help to soften crow's feet, forehead furrows, frown lines, lip lines, bunny lines etc. It can help to reduce thick bands around the neck region. It also can enhance appearance of skin dimpling of the chin. Also can help lift the corners of the mouth, soften the jaw line and improve a gummy smile.

Botox in facial wrinkles:

The cosmetic variant of botulinum toxin is a very famous nonsurgical treatment that can help temporary removal or elimination of facial fine lines and wrinkles. The predominant areas that are treated include frown lines, forehead creases, crow's feet near the eyes etc. Other areas which can be considered for treatment may include thick bands around the neck, thick jaw muscles, lip lines and gummy smiles.

Botox in facial contouring

Strong & enlarged masseters often give a square-jawed appearance. Excessively enlarged masculine muscles can be injected with Botox causing a decrease in size & a slimmer more attractive face and jawline.

Botox in excessive sweating (hyperhidrosis)

Patients with excessive sweating on the palms and soles or in the armpits which also makes routine work difficult in addition to social embarrassment responds very well to Botox treatment. Botox injection the affected areas is an effective way to counteract this condition.

Botox In a Migraine

In a migraine triggered by muscle activity, Botox injection into specific muscular trigger points helps to reduce the frequency & intensity of migraine attacks. Temporal migraine can be treated by Botox injections into the trigger points providing relief for upto 7 months

The botulinum toxin: mechanism of action

Botulinum toxin is a purified substance which is extracted from a bacterial source. Injections of botulinum toxin will lead to blockage of the nerve signals to the muscle. It is difficult for the proper contraction and relaxation of muscles without a signal. The outcome is reduces and decreased fine lines and wrinkles. The most popular botulinum toxin type A injections involve Botox, Dysport and Xeomin.

***The FDA has given permission for the use of Botox for removal or treatment of frown lines and crow's feet, while Dysport and Xeomin are only allowed to be used for treatment of frown lines.**

WHO NEEDS IT?/ CANDIDATURE FOR BOTOX **Who is the best candidate for BOTOX TREATMENT ?**

-  If you think this treatment will give you feeling of “wholeness”
-  If you think this treatment will give you feeling of femininity / masculinity

BENEFITS OF BOTOX

Treatment is relatively painless
This treatment has very little down time

PHYSICAL APPEARANCE:

Youthfulness

Ageing is a natural process which everyone goes through. Visible wrinkles, fine lines, blemishes are signs of ageing. Such skin flaws makes you look tired or aged. But with BOTOX TREATMENT like suitable treatment one feels younger, healthier and rejuvenated.

Natural

Nowadays BOTOX TREATMENT is gaining immense popularity because it produce results that blend extremely well with a patient's body aesthetics. Soon after the treatment, one gets back to the desired or normal shape of a treated body part. One does not have to wait long to see the result, which is the beauty of cosmetic treatment.

INCREASED CONFIDENCE AND ENHANCED MENTAL HEALTH:

Self Confidence is a tool that helps us face challenges and tackle problems in life, with great certainty. When you look good, you feel good which in turn increases your self confidence. It leads to greater willingness to try new things or open up in social situations. You become more willing and open to wearing certain clothes or participating in activities which you avoided prior to treatment, due to discomfort in your appearance.

Certain clinicians and psychologists feel, few corrections in your body parts, by cosmetic treatment can not only lead to emotional wellness but also enhanced mental health.

OTHER OPPORTUNITIES:

Studies do suggest that people that are more attractive benefit in their personal as well as professional lives.

Studies have also found, good looking people have a higher probability of getting promotions and making more salary.

A 2012 study published in Applied Financial Economics revealed that good looking real estate agents were able to sell properties at a higher price than agents that were average looking.
