CHEMICAL PEELS

What is CHEMICAL PEELS ?

Chemical peels as the name suggests is a technique that peels the skin to enhance and improve its appearance. The procedure involves the use of a chemical solution, which is applied on the skin. This technique is predominantly used for improving face but also can be used to enhance the skin on the neck and hands. A chemical peel is budget friendly and economical procedure for improving the appearance of the skin. The expected outcome of the technique completely depends on the type of chemical used and the protocol followed.

Who Needs It ? Who is the best candidate for CHEMICAL PEELS ?

You are suitable candidate If you are looking for skin improvisation in the following areas :

Acne or acne scars predominantly on the face.

Fine lines and wrinkles as a result of aging.

Irregular skin pigmentation as a result of tanning and excess sun exposure.

Treatment of skin damaged skin

Rough scaly and patchy skin due to nutrient deficiencies or allergies.

Skin discoloration/ lightening

Skin rejuvenation / resurfacing

Precancerous skin growths and also If you are in always conscious about your appearance.

If you think this treatment will help you to feel better about your appearance and restore your confidence .

If you think this treatment will make your appearance confident

If you think this treatment will give you feeling of “wholeness”

If your breasts are asymmetrical and treatment will improve symmetry

Benefits Of Chemical Peels :

- Deep chemical peel gives long lasting results.
- No anesthesia is required for this process.
- Patient have to take minimal post surgery care.
- Recovery is also fast.

Physical Appearance :

Youthfulness

Ageing is a natural process which everyone goes through. Visible wrinkles, fine lines, blemishes are signs of ageing. Such skin flaws makes you look tired or aged. But with CHEMICAL PEELS like suitable treatment one feels younger, healthier and rejuvenated.

Natural

Nowadays CHEMICAL PEELS is gaining immense popularity because it produce results that blend extremely well with a patient's body aesthetics. Soon after the treatment, one gets back to the desired or normal shape of a treated body part. One does not have to wait long to see the result, which is the beauty of cosmetic treatment.

Increased Confidence And Enhanced Mental Health :

Self Confidence is a tool that helps us face challenges and tackle problems in life, with great certainty. When you look good, you feel good which in turn increases your self confidence. It leads to greater willingness to try new things or open up in social situations. You become more willing and open to wearing certain clothes or participating in activities which you avoided prior to treatment, due to discomfort in your appearance.

Certain clinicians and psychologists feel, few corrections in your body parts, by cosmetic treatment can not only lead to emotional wellness but also enhanced mental health.

Other Opportunities :

Studies do suggest that people that are more attractive benefit in their personal as well as professional lives.

Studies have also found, good looking people have a higher probability of getting promotions and making more salary.

A 2012 study published in Applied Financial Economics revealed that good looking real estate agents were able to sell properties at a higher price than agents that were average looking.
