# DIMPLE CREATION

## What is Dimple Creation ?

DIMPLE CREATION is also known as **Dimpleplasty**. Many individuals wish that they were born with charming dimples to enhance or beautify their face. Across cultures dimples are considered a sign of good luck and prosperity. Also, dimples help enrich a smile and add character to it

## What is a dimple ?

A dimple is the natural outcome of a small defect within the muscle. The skin that sits on the top of this small muscle defect essentially conforms to the underlying tissue, creating the effect of a dimple in the cheek (or chin sometimes) when one smiles. DIMPLE CREATION surgery or dimpleplasty is a relatively easy and painless procedure to create a dimple for those who intend to want one. One can decide the location where the dimple will be, or can let the doctor decide the most optimal place for the dimples on the face.

## WHO NEEDS IT?/ CANDIDATURE FOR DIMPLE CREATION

### Who is the best candidate for Dimple Creation ?

By removing different amount of cheek muscles, it can be performed on any type of cheek, let it be chubby or skinny.

The surgeon can customize the dimples to match the appearance of rest of the facial features and can be made slightly smaller or larger depending on one's desire.

### Eligibility to undergo a Dimple Creation :

Any of the above mentioned reasons makes you a suitable candidate to undergo DIMPLE CREATION , But to be an eligible candidate for surgery you should also fulfill the following criteria:

Every surgical procedure including plastic or cosmetic surgery involves certain risks. You should undergo a DIMPLE CREATION only if you have a medical requirement or you feel that the particular surgery will enhance your quality of life.

You shall be a good candidate for the DIMPLE CREATION if you are healthy, you have realistic expectations from the outcome of the surgery and you are aware of all the risks associated with the procedure.

You cannot consider undergoing a cosmetic surgery if you have serious health issues like diabetes, heart diseases, high blood pressure, bleeding disorders like haemophilia or depression.

You shall not be a good candidate for the DIMPLE CREATION if you smoke or drink too much alcohol

You should have positive attitude!

You expectations from the outcome of the surgery should be realistic.

You should be ready to miss at least a few weeks of normal activity.

### **Benefits Of Dimple Creation :**

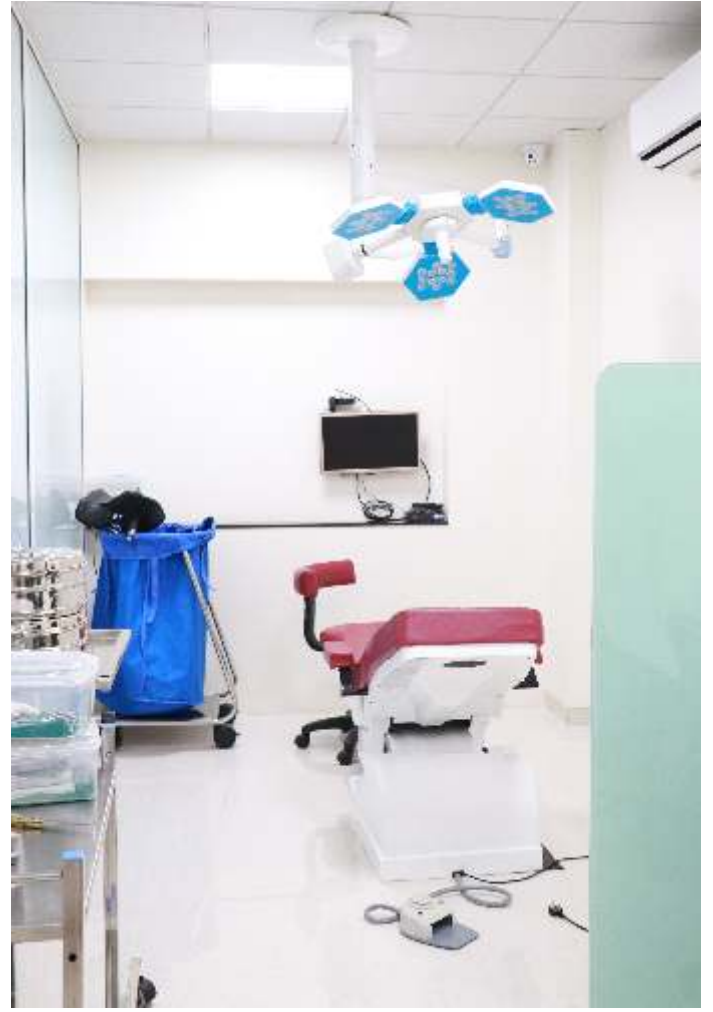

One of the biggest advantages of dimpleplasty is that it can be performed on absolutely anyone, irrespective of the size of cheeks.

The procedure takes about an hour with very minimal recovery time.

It is also a reversible and safe procedure.
