# EAR RESHAPING

## What is Ear Reshaping ?

EAR RESHAPING is also known as otoplasty. Cosmetic surgery of the ear is an aesthetic procedure that helps to alter the size, position, or proportion of the ears.

The result of otoplasty varies greatly depending on the changes that are desired by the patient. EAR RESHAPING is known to enhance and boost self-confidence in children and teenagers. If the ears bulge out, ear pinning can be done to flatten the ears against the head. If one ear is positioned higher than the other, ear repositioning can help create symmetry. Large, oversized ears can be addressed alone or in conjunction with other cosmetic surgeries. >

## Who Needs It ? / Candidature For Ear Reshaping / Who is the best candidate for Ear Reshaping ?

### The need for EAR RESHAPING :

If you are born with overly big or small ears.

If your ears are disproportionate in context to your head or oddly located.

If your ears bulge out noticeably.

If you have wretched with an injury that has negatively impacted the shape or positioning of the ears

Children are common patients for otoplasty. if and when the ears have reached their full size, which usually happens around age six.

A set-back otoplasty, is a procedure to reduce the prominence of ears that bulge out too much, can be performed on both adults as well as children

### Eligibility to undergo EAR RESHAPING :

**Any of the above mentioned reasons makes you a suitable candidate to undergo EAR RESHAPING , But to be an eligible candidate for surgery you should also fulfill the following criteria :**

Every surgical procedure including plastic or cosmetic surgery involves certain risks. You should undergo a

EAR RESHAPING only if you have a medical requirement or you feel that the particular surgery will enhance your quality of life.

You shall be a good candidate for the EAR RESHAPING if you are healthy, you have realistic expectations from the outcome of the surgery and you are aware of all the risks associated with the procedure.

You cannot consider undergoing a cosmetic surgery if you have serious health issues like diabetes, heart diseases, high blood pressure, bleeding disorders like haemophilia or depression.

You shall not be a good candidate for the EAR RESHAPING if you smoke or drink too much alcohol.

You should have positive attitude!

Your expectations from the outcome of the surgery should be realistic.

You should be ready to miss at least a few weeks of normal activity.

### **Benefits Of Ear Reshaping**

Cosmetic surgery of the ear is an aesthetic procedure that helps to alter the size, position, or proportion of the ears.

### **Advantages of EAR RESHAPING :**

Otoplasty can improve the shape and proportion of the ears.

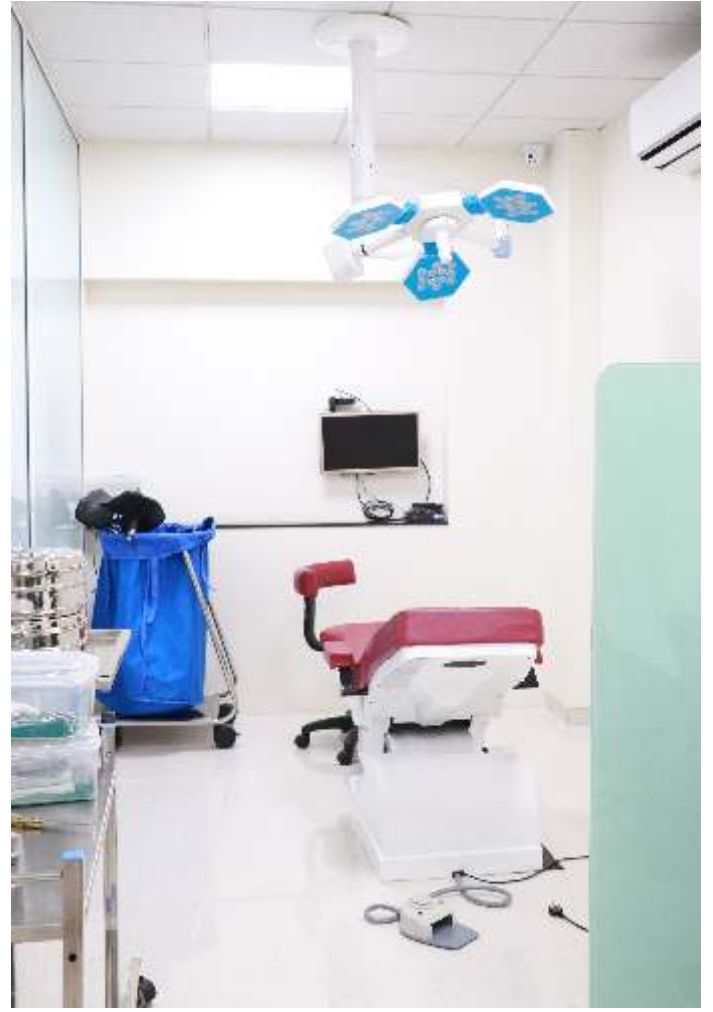

An ear surgery can enhance self-confidence

It is a minimal-risk procedure that can be also performed on children over the age of five.

The biggest of EAR RESHAPING is that the outcome normally lasts for a lifetime with minimal fluctuations.
