THRADLIFT

What is THREAD LIFT ?

Thread lift is a technique used to overcome sags and folds. It has become immensely popular lately since the awareness of skin care is increasing day by day. It is a very good alternative for both men and women who cannot afford time to undergo a face lift and the healing time associated with the procedure.

Applications :

Individuals prefer a thread lift to reduce signs of premature ageing and sagging skin on the face and neck.

Thread lifts are the best alternative to facelift surgery for treating,

Sagging cheeks

Jowls

Double chin

Deep wrinkles and nasolabial folds

Facial volume loss

Effects of a single procedure last for 1 1/2 - 2 Years. The threads are completely absorbed by the body during that period.

Results are seen immediately following this office procedure and continue to improve over time as collagen production and moulding occur.

Thread lifts can be used in combination with fillers or chemical peels for optimum results.

WHO NEEDS IT?/ CANDIDATURE FOR THREAD LIFT

Suitable candidate for a Thread Lift

You can opt for need Thread Lift

If one feels that face has lost its youthfulness and charm.

Appearance of loosened skin on the midface and the jawline.

- Deep creases developed from the nose to the corners of the mouth (also known as nasolabial folds)
- Lines extending from each corner of the mouth down till the chin (called as marionette lines) displayed or fallen facial fat.
- Sagging and loss of muscle tone in the lower face, eventually resulting in jowls.
- Appearance of double chin, as a result of loose skin and excess fatty deposits under the chin and jaw.
- Creasy and sagging skin of the neck and also If you think this treatment will help you to feel better about your appearance and restore your confidence in your sexuality.
- If you think this treatment will make your appearance confident
- If you think this treatment will give you feeling of “wholeness”
- If you think this treatment will give you feeling of femininity / masculinity

BENEFITS OF THREAD LIFT

The biggest advantage of the technique is, it is a minimally invasive cosmetic enhancement technique. But it cannot be considered as an alternative for a facelift. It is a decent procedure which provides subtle changes rather than drastic results, and also can help people buy time before a face and neck lift may be needed.

Another advantage of a thread lift is the removal of scars and uneven pigmentation with hardly any down time from routine activities. It is considered more effective when combined with other non-invasive techniques like anti-wrinkle injections, laser treatments and facial peels that improve the skin texture. Liposuction can also be performed simultaneously to improve the contours of the face and rejuvenate the face.
