TUMMY TUCK

What is TUMMY TUCK ?

Abdominoplasty is commonly and famously known as tummy tuck.

Generally with weight gain or obesity, excess fat and skin is accumulated around the abdomen region or the midriff.

A tummy tuck helps to flatten the abdomen. Abdominoplasty targets removal of undue fat and skin and also tightens muscles of the abdominal wall.

Along with the extra fat it can also shrug off some if not all of the stretch marks present on the lower abdomen area.

A tummy tuck is preferred mostly post pregnancy, or when one needs to undergo humongous weight loss or also when one has a flabby stomach with weak muscles impairing the body contour.

The biggest advantage of patients undergoing abdominoplasty is improved self-confidence as an outcome of the procedure.

It is extremely important to consult a renowned cosmetic surgeon who will guide and suggest the best suitable option with realistic expectations.

WHO NEEDS IT?/ CANDIDATURE FOR TUMMY TUCK

Who is the best candidate for TUMMY TUCK ?

If you think this surgery will help you to feel better about your appearance and restore your confidence in your sexuality.

If you think this surgery will make your appearance confident!

If you think this surgery will give you feeling of “wholeness”!

To allow you to wear certain clothes which you like !

BENEFITS OF TUMMY TUCK

You will look much smarter because your clothes drape better on your body.

Rash or chafing caused by loose skin will be eliminated.

Bulges and roll will be eliminated due to surgery. This will improve your attitude towards yourself.

PHYSICAL APPEARANCE:

Youthfulness

Ageing is a natural process which everyone goes through. Visible wrinkles, fine lines, blemishes are signs of ageing. Such skin flaws makes you look tired or aged. But with TUMMY TUCK like suitable treatment one feels younger, healthier and rejuvenated.

Natural

Nowadays TUMMY TUCK is gaining immense popularity because it produce results that blend extremely well with a patient's body aesthetics. Soon after the surgery, one gets back to the desired or normal shape of a treated body part. One does not have to wait long to see the result, which is the beauty of cosmetic surgery.

WEIGHT LOSS:

Liposuction is a process in which the body is reshaped by removing fats from that particular part of the body, and it typically targets problem areas that do not respond well to diet and exercise.

Patients seeking body contouring find it is easier to keep the weight down after lipoplasty. The positive results of liposuction can influence the patient to maintain a healthy diet and exercise program to keep their weight in check.

Appropriate weight control can lead to a healthier body and reduced risks associated with obesity and excessive weight gain.

INCREASED CONFIDENCE AND ENHANCED MENTAL HEALTH:

Self Confidence is a tool that helps us face challenges and tackle problems in life, with great certainty. When you look good, you feel good which in turn increases your self confidence. It leads to greater willingness to try new things or open up in social situations. You become more willing and open to wearing certain clothes or participating in activities which you avoided prior to surgery, due to discomfort in your appearance.

Certain clinicians and psychologists feel, few corrections in your body parts, by cosmetic surgery can not only lead to emotional wellness but also enhanced mental health.

OTHER OPPORTUNITIES:

Studies do suggest that people that are more attractive benefit in their personal as well as professional lives.

Studies have also found, good looking people have a higher probability of getting promotions and making more salary.

A 2012 study published in Applied Financial Economics revealed that good looking real estate agents were able to sell properties at a higher price than agents that were average looking.
